- Figma

CODING

Leetcode: Global rank 2542000

PROFILE

I am pursuing a BTech in Computer Science and Engineering at VIT Bhopal University. Programming languages such as C++, Python, and JavaScript, as well as proficiency in web development technologies including HTML, CSS, and React. My coursework has also provided me with a thorough understanding of data structures, algorithms, and software engineering principles.

PROJECTS

Hotel Booking Website (SEP 23 – DEC 23)
Front End Developer, UI/UX

Description: Hotel Booking Website is a user freindly website featuring an intuitive interface for searching and booking hotels, secure user authentication, real-time room availability, payment processing, and a responsive design. Include admin tools for managing listings and bookings, prioritize security, and ensure legal compliance.

- Technology: HTML/CSS, JavaScript, ReactJS
- Team Project: 5 members

Hospital Website (Dec 23 – Mar 23)
Front End Developer, UI/UX

Description: As part of a recent project, I developed a comprehensive hospital website aimed at enhancing patient engagement and strea-mlining administrative processes. The website was designed with a focus on user experience, accessibility, and responsiveness across various devices.

- Technology: HTML/CSS, JavaScript, ReactJS
- Team Project: 8 members

Portfolio Template (Apr 24– May 24)
Software Development

I designed and developed a personal portfolio website to showcase my skills, projects, and professional experience. The website serves as an interactive and engaging platform for potential employers and collaborators to learn more about my work.

- Technology: HTML/CSS, JavaScript, ReactJS
